

\$69 PER BADGE PER YEAR NO EXTRA FEES!*

PROTECT YOURSELF, PROTECT YOUR EMPLOYEES, SAFEGUARD YOUR BUSINESS.

WHY SHOULD YOU USE OUR SERVICE?

Sierra Radiation Dosimetry Service should be an active member of your radiation protection program. We are dedicated to providing our clients the best service and accurate radiation dose assessments all at very competitive prices. At Sierra we have a dedicated team of knowledgeable Health Physicists that are eager to help our clients understand their dosimetric results, and to guide our clients to informed decisions regarding their radiation protection program. Our principle team members have over 40 years of Dosimetry and Radiation Protection experience and offer state of the art dosimetry products that are NVLAP accredited (Lab Code 100555). Learn more at www.sierradosimetry.com/products.aspx.

WHY SHOULD YOU BADGE?

State regulators require businesses where workers are exposed to 10% of the yearly radiation limit set by federal regulation 10 CFR 20.1201 to monitor employees with a radiation badge. Unfortunately, 1 in 3 people will be diagnosed with cancer in their lifetime, by monitoring employees you can be sure you don't expose yourself to unnecessary liability.

Sierra uses a process accredited by the National Institute of Standards & Technologies (NIST) through the National Voluntary Laboratory Accreditation Program (NVLAP) to assure that the radiation reports you receive are accurate and represent a formidable proof of the actual radiation hazards present in the workplace.

WHAT DO WE OFFER?

Sierra uses an advanced NVLAP accredited Genesis Ultra TLD Dosimeter Personnel Monitoring Badge for the highest precision in determination of occupational radiation dosages. Sierra's TLD dosimeter is designed to monitor exposure from X-Ray, Gamma, Beta and Neutrons of known energy and measures doses at three tissue depths, corresponding to the deep, shallow, and lens of the eye doses required by 10 CFR 20. It is an excellent dosimeter for nearly all medical and industrial radiation environments and is available for Monthly, Bi-Monthly, or Quarterly wear periods for routine personnel, area and environmental monitoring.

QUARTERLY EXCHANGE

| Quantity | Annual Price per Badge (USD) | |

*Lost badge fee of \$15 applies to all badges not returned within 60 days of the endwear period.

Sierra Dosimetry is pleased to announce we have built a Personal Dose History tool allowing each individual wearer to access their own dose history using their own secure username and password. You, as the account administrator, can provide your employees with their username and passwords which will give them access to just their dose history while working at your facility. All account and privacy information remains secure.

Our Personal Dose History tool displays a wearer's dose history in a way that is both easy to read and informative. The visual display is built so you can easily determine if a dose is normal or a cause for concern.

Best of all, there is no cost to utilize this tool. We strive to continually improve our service to you.
